DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 20, 2008 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-24 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 20 are indefinite because it is unclear how to interpret the limitation "...in case the slip between said transmission members is not detected in spite of lowering said pressure by a preset value said pressure lowering means, when the prerequisite condition is not satisfied during lowering the pressure." It is unclear if the pressure setting means functions is only when the condition is not satisfied.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-24 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Miki et al (US 2002/0165064).

Miki et al disclose a decision means (12) for deciding whether or not a predetermined prerequisite condition for lowering the pressure is satisfied (§ 91-§ 93), a pressure lowering means (93) for lowering said pressure by a preset value when the decision means decides that the prerequisite condition is satisfied (§ 91 - § 118); and pressure setting means (92) for setting said pressure to a value obtained by adding a pressure corresponding to the road surface input to a lowered minimum value of said pressure (§ 143), in case the slip between said transmission members is not detected in spite of lowering said pressure by a preset value said pressure lowering means (§ 4).

Response to Arguments

Some further comments regarding the applicant's remarks are deemed appropriate.

The applicant argues that Miki et al reference fails to meet the limitations of the claims because it fails to disclose the claim limitations of the pressure lowering means

Art Unit: 3682

and the pressure setting means. The Examiner disagrees. The claimed subject matter is clearly described.

It is also argued that the Miki et al reference fails to meet the limitations of claims 2 and 3. The Examiner disagrees. Regarding claim 2, see ¶¶91 - ¶104. Regarding claim 3, see ¶95.

The applicant's remarks have been accorded due consideration, however, they are not deemed fully persuasive.
